## PROJECTS

---

### DDRS Community - Web App

Create community forum like Microsoft community/ stack overflow. We are planning to use MERN as our technology. As a user can log in to the system and create forum then get answers from community users. And as a admin, admin can manage forum and word filtering options.

**Responsibility** - Developed user management system

**Technologies** - MERN Stack, VS Code, Bootstrap, Material UI, Firebase(Host), GitHub(VCS)

### Cake Ordering System - Mobile App

This app is designed for home-based cake businesses, connecting sellers and customers seamlessly. Customers can browse cake categories, place orders, check order status, and pay through cash on delivery. Sellers can advertise their cakes, accept or reject orders, and manage delivery. Easy and efficient cake transactions for both parties.

**Responsibility** - Customer cart handling and order management

**Technologies** - JAVA, Android Studio, Firebase(Host), GitHub(VCS)

### ElectroGrid Bill Service - Web App

Created the back-end using Restful web services with MVC architecture. According to the electric usage generate the monthly bills and automatically send to the users.

**Technologies** - JAVA, Maven, jQuery, Eclipse, MySQL, GitHub(VCS)

### My Personal Portfolio - Website

Developed a dynamic portfolio website with HTML, CSS, and JavaScript, displaying my skills, projects, and achievements. Offers a comprehensive view of my expertise.

**Technologies** - HTML, CSS, JavaScript, Netlify(Host)
