PROJECTS

🔗 DDRS Community - Web App

Create a community forum like Microsoft community/ stack overflow. We are planning to use MERN as our technology. A user can log in to the system and create a forum then get answers from community users. As an admin, the admin can manage forum and word filtering options.

Responsibility - Developed user management system

Technologies - MERN Stack, VS Code, Bootstrap, Material UI, Firebase(Host), GitHub(VCS)

🔗 Cake Ordering System - Mobile App

This B2C app streamlines home-based cake businesses by seamlessly connecting sellers and customers. Users can easily browse cake categories, place orders, check order status, and opt for cash on delivery. Sellers benefit from advertising their cakes, managing orders, and overseeing delivery, ensuring swift and efficient transactions for both parties.

Responsibility - Customer cart handling and order management

Technologies - JAVA, Android Studio, Firebase(Host), GitHub(VCS)

🔗 ElectroGrid Bill Service - Web App

Created the back-end using Restful web services with MVC architecture. According to the electric usage monthly bills are automatically sent to the users.

Technologies - JAVA, Maven, jQuery, Eclipse, MySQL, GitHub(VCS)

🔗 My Personal Portfolio - Website

Developed a dynamic portfolio website with HTML, CSS, and JavaScript, displaying my skills, projects, and achievements. Offers a comprehensive view of my expertise.

Technologies - HTML, CSS, JavaScript, Netlify(Host)

EXTRA CURRICULAR ACTIVITIES

University Activities

- Member of LEO club
- Member of Chess club
- Member of the Swimming club

School Activities

- Member of Chess club
  - Hambantota District Youth Chess Championship under 18 1st Runner up (2017)
